Note

1. The features of Claims 1–3 are precisely an artificial convention involved in making cable laying plans, and do not constitute the creation of a technical idea which utilizes laws of nature.
2. The features of Claims 4–6 involve a recording medium which can be read by computer, but what is recorded on the medium is precisely a processing procedure and constitutes a simple low order of information, and thus those features do not constitute the creation of a technical idea which utilizes laws of nature. (Even if one interprets this as involving a recording medium on which a program is stored for causing a computer to perform the various processing steps, since there is no statement regarding the point of cooperation of the information processing by the software with the hardware resources of the computer, this would not constitute the creation of a technical idea which utilizes laws of nature.)

No reasons for rejection have been discovered as of now for inventions as per claims other than the claims indicated in this Notification of Reasons for Rejection. If any reasons for rejection are newly discovered, a Notification of Reasons for Rejection will be issued.
